

PHLEBOTOMY TECHNICIAN - CERTIFICATE OF COMPLETION

The Certificate in Phlebotomy prepares students for employment as a Phlebotomist Technician and includes skills with a bio-psychosocial-cultural approach to client care. The coursework includes class and lab practice prior to practice in the clinical setting consisting of phlebotomy, pre and post analytical considerations, safety and lab maintenance, basic point of care testing and the associated specimen testing. In order to be eligible to participate in the clinical setting, students are required to successfully pass a background check through the New Mexico Department of Health Caregivers Criminal History Screening Act, be granted employment clearance prior to clinical assignment and participation, and are current on all immunizations. Successful coursework completion requires a grade of "C" or better, a grade of pass on all skills checklists, a final exam grade of 84% or better, 80% average of clinical/lab, and completion of all assignments. Successful completion includes 100% attendance for class, lab, and clinical time. Upon successful completion of all coursework, a student has met all requirements for eligibility to test through the National Health career Association (NHA) for certification as a Phlebotomist Technician.
