

ART (ART HISTORY) - BACHELOR OF ARTS

The art history program is designed to give the student a broad familiarity with the visual arts through the factual and theoretical study of aesthetics, cultural contexts, iconography, stylistic development and technical practices. Students explore a range of methodologies and theoretical lenses through which to study objects and images. Art history coursework opens up broader questions about structures of race, class, sexuality, gender, identity and power as it relates to art, with a particular emphasis on the unique lens of the border region in which we are located. Art history is fundamentally interdisciplinary, therefore, students should take related courses in anthropology, history, languages and literature, music history, philosophy, religion, and theatre history.

Students are **strongly** encouraged to study at least one other language to prepare them for advanced research in the discipline, as the study of art is especially dependent on written sources in other languages. A degree in art history is excellent preparation for a range of careers, including in museum and galleries, education, travel and tourism, auction houses and estate sales, art and copyright law, equity analysis and public relations, arts correspondence and journalism, appraisal, libraries and archives, and more.

Students must complete all University degree requirements, which include: General Education requirements, Viewing a Wider World requirements, and elective credits to total at least 120 credits with 48 credits in courses numbered 300 or above. Developmental coursework will not count towards the degree requirements and/or elective credits, but may be needed in order to take the necessary English and Mathematics coursework.
